

Project Update Template — CSD1161

Instructions: Fill and complete one copy of this document (in GitHub /docs/updates and publish to wiki) each week or maintain a running copy and update the Week sections below. Keep links accessible to the TA (public or add as collaborator).

Cover Info

- Team name: Group 4
- Project title: Notetaking App(Notenest)
- Members (names & emails): Ivan Du(ivandu@my.yorku.ca), Tharany Jayasankar(tharany2@my.yorku.ca),
Naman Manchanda(namanm@my.yorku.ca)
Yasin Hosseini (yasinnop@my.yorku.ca)
- Update #2: | Date: 2025/10/28

Topic: Notetaking App

At-a-glance:

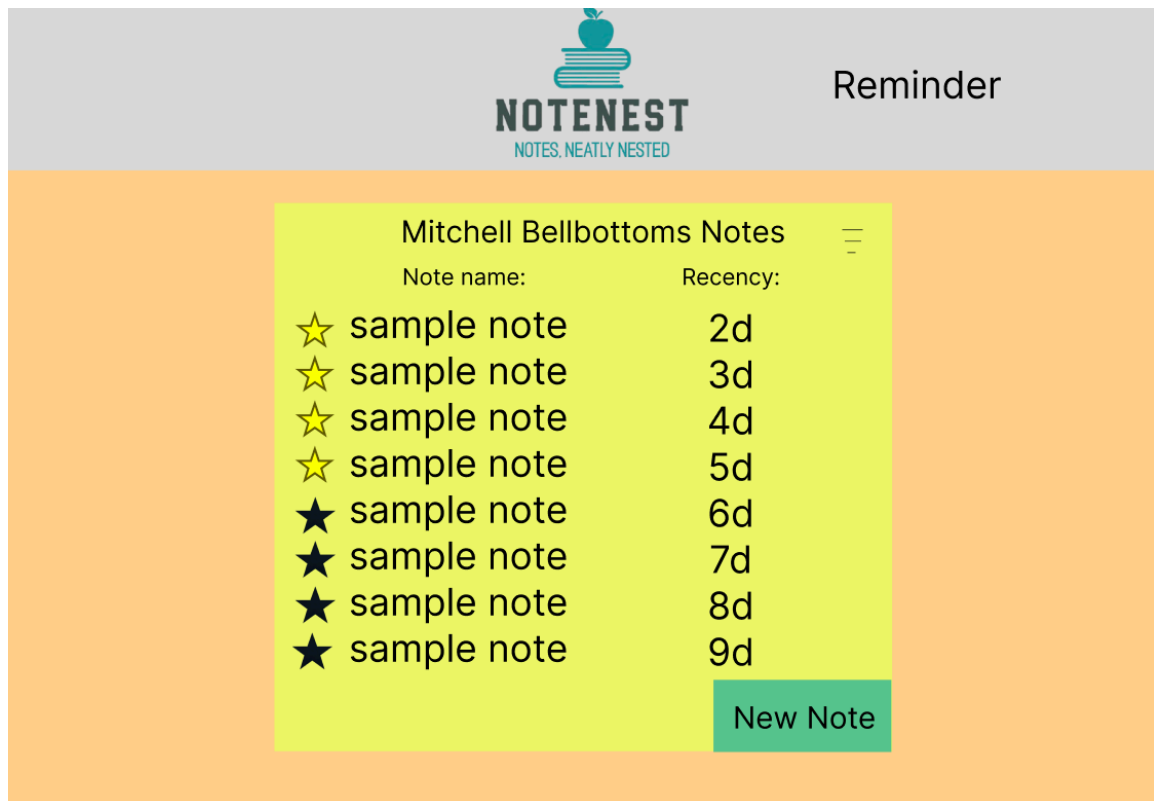

Overall status	% complete (this week)	Top risk (one line)	Ask for TA/instructor
On track / At risk	90% of this week's work 15% of the project	Finishing each frame by the group set deadline	N/A

What we shipped/completed this week:

- 80% of home screen has been coded
- Learned github command line
- Refreshed on Java knowledge
- Finalize prototype 1 design

Evidence & Links (paste URLs):

Decisions made (owner, date):

- New note screen must be completed prior to save feature being done (Ivan, 10/28/2025)
- Note screen rough layout and functionality should exist by week 8 (Ivan, 10/28/2025)
- Save feature should be done by week 9 as the home screen requires the saved files to be displayed on home screen (10/28/2025)

Challenges & risks (severity, mitigation):

- Coding skill level is different (Medium, Have them manage the layout while the more advanced coders can work on functionality)
- Time constraints (High, work as much as we can outside class)

Plan for next week (task → owner → due date):

- Note screen rough layout (Tharany, Week 8)
- Note screen functionality (Tharany, Week 8)
- Finalize other 2 prototypes (Naman and Yasin, Week 8)

- Reminders Screen Foundation (Ivan, Week 8)
